PROFILE

Full Stack Developer with over six years of experience in web application development, specializing in the .NET ecosystem and JavaScript frameworks. Demonstrated ability to deliver end-to-end features across SaaS products in international HR management and e-commerce domains. Committed to continuous professional development, currently pursuing a Master's degree in Software Engineering at the University of Oulu, Finland. Proficient in Agile methodologies, cloud infrastructure on Microsoft Azure, and AI-assisted development workflows.

PROFESSIONAL EXPERIENCE

University of Oulu — M3S Research Unit , *University Trainee* 08/2026 – 09/2026 | Oulu, Finland
Project: Low Carbon Alerts — AI-assisted energy recommendation system
Domain: Sustainable energy, demand-side management
Technologies: Nuxt/Vue 3, TypeScript, Cloudflare (Workers/D1/Vectorize, Drizzle ORM), Firebase Cloud Messaging
Responsibilities:

- Designed and built an AI-assisted notification system delivering personalized low-carbon energy recommendations to residential users, integrating with the Flip/Sähköjälki carbon intensity forecast API.
- Implemented a RAG pipeline using Cloudflare Vectorize and Workers AI embeddings to ground LLM recommendations in a curated energy-saving knowledge base.
- Engineered a smart-alert notification system with hourly Cron Trigger scheduling, per-user active-hour filtering, debounce logic, and browser push delivery via FCM and Service Workers, including PWA support for iOS 16.4+.

Tes (UK) / Schrole Group (Australia) , *Full Stack Developer* 05/2023 – 04/2026 | Remote
Products: Schrole Cover & Schrole Connect
Domain: HR management software for the international education sector
Technologies: .NET 8, ASP.NET MVC, Vue 3, SQL Server 2019, Azure Blobs, SignalR, Bootstrap 5, xUnit, Playwright, Jira, Bitbucket
Responsibilities:

- Developed full-stack features for profile management, vacancy management, and application management modules serving international teacher candidates and school administrators.
- Designed and implemented RESTful APIs using .NET 8 with middleware pipelines for request validation, authentication, and response transformation.

- Contributed to a large-scale codebase modernization initiative, improving maintainability and supporting the migration of legacy components to .NET 8 and Vue 3 while delivering new product features in parallel.
- Maintained test coverage standards by authoring unit and end-to-end tests with xUnit and Playwright.
- Developed the admin interface using ASP.NET MVC and Bootstrap 5, accelerating internal operations workflows.
- Authored and optimized SQL Server stored procedures, views, and functions to support reporting and data migration tasks.
- Integrated Claude (Anthropic API) and GitHub Copilot into personal development workflow, reducing boilerplate generation time and accelerating code review cycles.

Saigon Technology , *Full Stack Developer* 02/2022 – 04/2023 | Ho Chi Minh City
Domains: Human resource management, customer data management
Technologies: .NET Core, Vue.js, SQL Server, Azure Functions, Azure Queue Storage, Azure Web Apps, Redis Cache, EPPlus, JWT
Responsibilities:
- Designed and implemented a bulk CSV import pipeline capable of processing large-scale employee and customer datasets, reducing data onboarding time by an estimated 65% compared to manual entry.
- Built a time-off management system with employee record creation and period summarization, adopted by approximately 200 internal users.
- Deployed application infrastructure to Azure App Service, establishing the team's first cloud-hosted production environment.
- Authored SQL Server stored procedures and Dapper-based data access layers, ensuring consistent query performance under concurrent load.

Yoong Solutions , *Full Stack Developer* 08/2018 – 01/2022 | Ho Chi Minh City
Product: Fanfan (fanfan.vn) — outdoor and camping retail e-commerce platform
Domain: Retail e-commerce
Technologies: .NET Core, React, Vue.js, SQL Server, Azure Functions, Azure Queue Storage, Azure Web Apps, Redis Cache, EPPlus, JWT
Responsibilities:
- Delivered CMS features for product management and order management modules serving a retail client.
- Designed and deployed Azure Functions-based microservice background jobs for scheduled data processing.
- Implemented Redis Cache for search result caching.
- Applied JWT-based authentication and authorization across mobile and web API layers, satisfying security requirements for a multi-tenant platform.
- Managed database schema using .NET Entity Framework migrations on SQL Server.

EDUCATION

University of Oulu 09/2025 – Present | Oulu, Finland
Master of Science in Software Engineering and Information Systems

Ho Chi Minh City University of Science, *Bachelor of IT Service Science* 2017 – 2020 | Vietnam

TECHNICAL SKILLS

Languages
C#, JavaScript, TypeScript, SQL, Python (basic)

APIs & Auth
RESTful API design, JWT, middleware pipelines, SignalR

Cloud
Microsoft Azure (App Service, Functions, Queue Storage, Blobs)

AI Tools
Claude (Anthropic) API, GitHub Copilot, ChatGPT; prompt engineering for code review, test generation, and API documentation

English
IELTS 6.5 (January 2025)

Frameworks

.NET, ASP.NET MVC, .NET Core, Vue.js 3, React.js, Angular

Databases
SQL Server 2019, MySQL, Redis Cache, Cosmos, Mongodb, Dapper, Entity Framework

Testing
xUnit, Playwright, unit testing

DevOps & Tools
Git, GitHub, GitLab, Bitbucket, Jira, Trello, Agile/Scrum
